Introduction

Our possibilities are only limited by your ideas.

Chládek and Tintěra Havlíčkův Brod, a.s.

Our company was established in 1994. the manufacturing agenda is thus based on the long experience of its founding workers in the field of rail, road, and building construction. We implement traffic, building, water management and engineering projects.

We have cargo vehicles, specialised machines and modern technology at our disposal all in alignment with the main activities of the company. We undertake geodetic and project operations for the realization of projects, as well as recycling and disposing of building materials.

We turn public and private investor visions into actual projects. Our main goal is bringing together all our services in order to create projects from start to finish.

Based on the demands of the investor we provide a business goal, project studies, project documentation,

business permits, building work and final building approval.

Our building projects employ standard technological procedures and modern methods on a correct technical level in an optimal time frame and adhering to the financial budget.

We hold a valid certificate system of quality management ČSN EN ISO 9001:2016, the environmental management ČSN EN ISO 14001:2016 and health and safety management ČSN EN 45001:2018.

We focus on handing over top project results and guarantee quality results under warranty. Client satisfaction is our key priority.

Rail

Road and highway

Transport and machinery

Land buildings

Building waste recycling

Water management and engineering

Construction, reconstruction and repair of railway lines and trains

- Construction, reconstruction and repair of railway lines and trains
- Construction, reconstruction and repair of railway stations
- Construction, reconstruction and repair of rail platforms
- Providing reconstruction and repair of crossings of all kind
- Providing reconstruction and repair of passes of all kind
- Geometric positioning of track switches and railway lines
- Welding of track and railway line steel parts
- Provision and construction of insulated parts (LIS and A-LIS)
- Construction and maintenance of contactless track (CT) modification of clamping temperature.
- Welding technology for CT, all documentation of CT, including documents concerning join geometry LIS and A-LIS (electronic measurement) and un-destructive tests of joins, using radiography.
- Railway superstructure diagnosis, measuring trolley KRAB- in cooperation with the company Chládek a Tintěra, Pardubice a.s.
- Technical overseeing of the technical status in accordance with č. 177/95 Sb
- Railway line traffic management
- Rail and track management

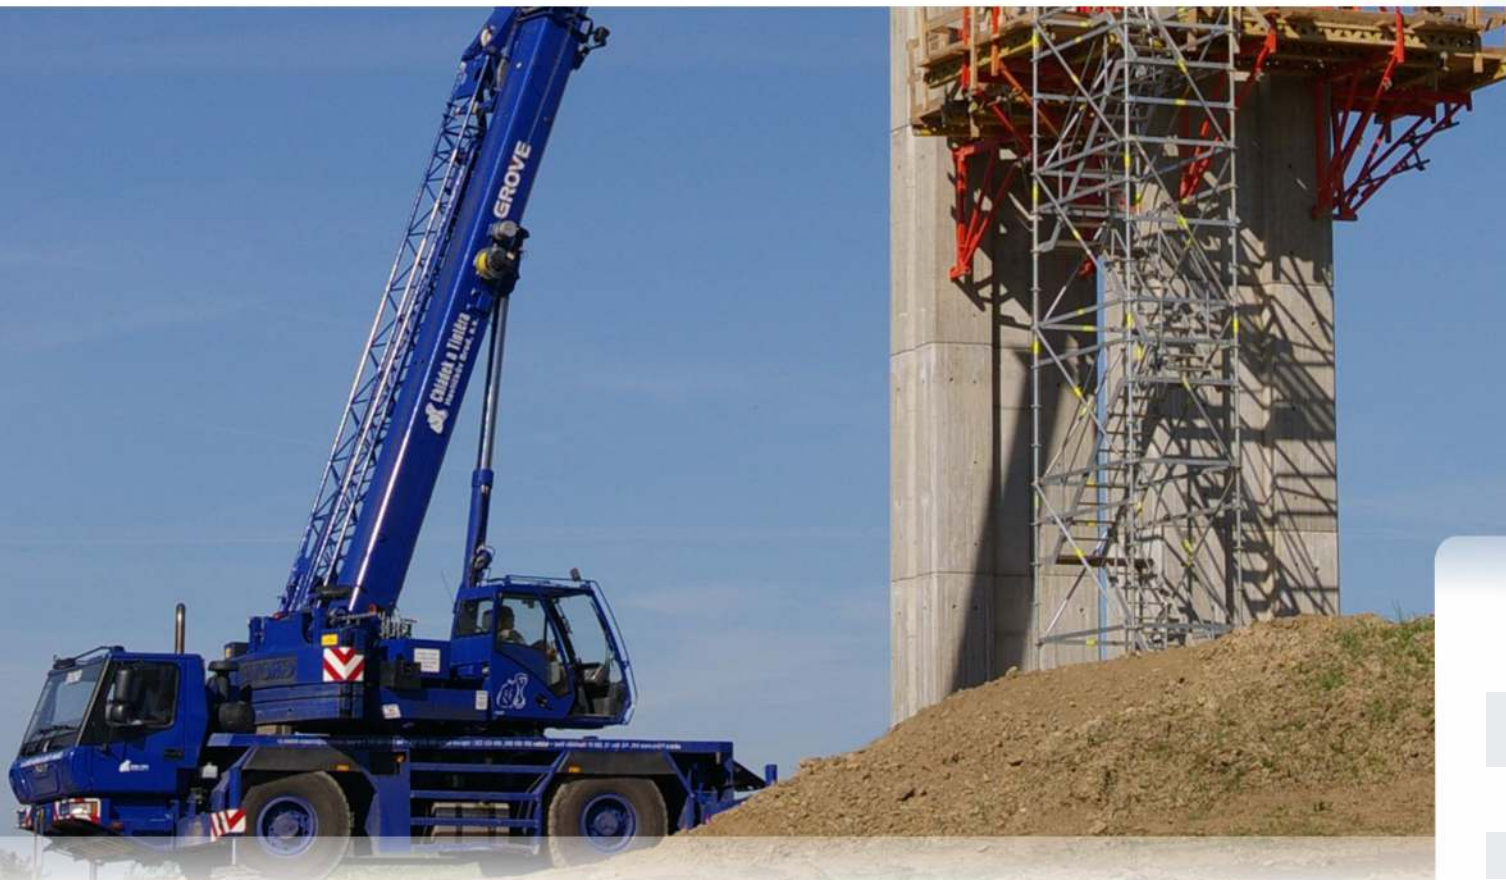

Construction,
reconstruction
and repair of roads
and highways

- Construction, reconstruction and repair of roads and highways
- Construction, reconstruction and repair of serviceable paths, pedestrian zones, pavements and trails
- paves surface realizations: parking lots, ramps, drives, speed limit zones and special constrictions
- spare time activity areas, sports areas and playgrounds
- water management constructions
- Concrete and stone products for strengthening areas and highways
- Decorative concrete with many varieties of colour and decor

Standard material preparation

- Transport of regular materials from 3 tons to 29.40 tons
- Transport of loose materials from 1 ton to 28 tons
- Large scale load transportation up to 90 m³
- Transportation of Oversize loads up to 36 tons
- Ground work machinery
- Crane operation up to 100 tons – special extension available 80 m
- Two-way wheel digger operations
- In house garage for company vehicle maintenance and locksmith production
- Traffic sign realization

The in-house maintenance hall provides

- Maintenance and repair of company machines
- Locksmith production
- Machine aided steel fixing
- Welding
- Coach smith
- Intervention on building site service

Machines on offer

Offsite loaders

TATRA PHOENIX load capacity 13,5 t,
with trailer of load capacity 17 t

TATRA T815 load capacity 13,5 t,
with trailer of load capacity 13 t

IVECO load capacity 9,7 t

puller with semi-trailer 30 t

Special vehicles

Special vehicles

Moto crane GROVE load capacity 100t

GROVE load capacity 35t

Moto crane TATRA T815, load capacity 20 t

VOLVO HR load capacity 10t with hydraulic arm
and container

Spacer bar rental

VOLVO puller and DAF puller with trailer of load
capacity 35t (car platform of 13.5 m length- optional rent)

Cistern MERCEDES BENZ – capacity 6800 l

Machinery for ground work

Two-way wheel digger LIEBHERR A922 RAIL,
accessories in the form of rail crane fixture:

- Crane hook
- Rotator with quick fix
- Bush growth mulcher
- Jack hammer
- Sleeper changer
- Floor saw for tarmacked surfaces
- Rail field gravel sweeper

Wheeled digger LIEBHERR A311

Two-way wheel digger LIEBHERR A922 RAIL

Spider digger MENZI MUCK

Loader NEW HOLLAND LS170 B

Drum roller BOMAG B170

Drum roller HAMM H7i

Drum roller STA VV1500D equipped with compact meter
and spiked segment

Back hoe loader LB 115B NEW HOLLAND

Forklift DESTA, loading capacity 3,2 t

Telescopic crane grab ICARUS

New buildings,
reconstructions
of habitable buildings,
administrative buildings,
industrial buildings

- › New buildings, reconstructions of habitable buildings, administrative buildings, industrial buildings, family houses, hospital buildings and other health centres
- › Industrial buildings, production halls, prefabricated building systems and monolithic constructions, eco buildings

- › Revitalization, reconstruction and maintenance of buildings based on project plans
- › Floor production in business and industrial spaces, underground garages, parking lots, store house and store areas
- › Monolithic concrete constructions using PERI system

- › Concrete constructions – basic crane track
- › Sound proofing measures and walls
- › Special insulation and insolation system installation
- › Interior and exterior facade installation of varying degrees of complexity and varying technologies

Developer activities

- › Construction of commercial and development properties from land acquisition to final product
- › Rent and sale of properties and land
- › Investment operation management
- › Engineering work, including project documentation.

Building waste collection management (concrete, tarmac, ground, gravel...)

Machines on offer

Mobile crusher RUBBLE MASTER RM 100 GO

Power 200 t/hour
Entry hole size 950 x 700 mm
Belt weight
Magnetic metal separator
weight 28 tons

hanging sorter RUBBLE MASTER MS 105 GO

power 200 t/hour
2 sorting sizes
Belt weight

Mobile jaw crusher RESTA

power 70 t/h
entry hole size 710 x 500 mm
Magnetic metal separator
weight 18 tons

mobile sorter RUBBLE MASTER TS3600

power 200 t/hour
3 sorting sizes (sub-sieve, inter-sieve and super sieve)
Maximum incoming material size 250 mm
Feeder size 3,8 m³
Conveyor belt total weight 15,5 tons

Course sorter POWERSCREEN Warrior 1400

Power 200 t/hour
3 sorting sizes (sub-sieve, inter-sieve and super sieve)
Feeder size 6,7 m³
weight 25 tons

Course sorter ANACONDA DF 410

Power 180 t/hour
3 sorting sizes (sub-sieve, inter-sieve and super sieve)
Feeder size 2,8 m³
weight 15,5 tons

wheeled loader NEW HOLLAND W170C

spade size 2,8 m³
weight 16 tons

wheeled loader NEW HOLLAND W 190B

spade size 3,2 m³
weight 19 tons

wheeled loader CAT 962K

spade size 3,6 m³
weight 20 tons

backhoe NH LB 1115B + hydraulic hammer

- Stone and Building material crushing and sorting
- Building material collection with capacity up to 20,000 Tons
- Building material recycling (concrete, tarmac, ground, gravel...)
- Mobile collection and buying out of waste
- Recyclable and soil sorting sale
- Demolition services

Revitalization
and mud removal
in ponds
and water area...

- › Revitalization and mud removal in ponds and water area
- › Construction and reconstruction of water tanks, ponds, dry polders and drainage systems
- › Wetland establishment and pool construction
- › Construction and reconstruction of water cleaners and water correctors including cleaning technology provision
- › Comprehensive provision of works for basic technological equipment construction
- › Construction and reconstruction of water and sewer systems
- › Construction and reconstruction of concrete and stone walls for water ways
- › Landscaping preparation
- › Land slide stabilisation

Geodetic and project
management in the field
of transport, land
engineering constructions,
land registry documents

- Geodetic and project management in the field of transport, land engineering constructions, land registry documents
- Map and plan issuing (information for project managers)
- Land registry documents, geometric issuing
- Passing of older buildings into land registry, measurement of historic and new interior spaces. Crain rail, hanging objects, settling and deformation of cubage
- Geodetic and project activities for DIY constructions
- Cooperation in formulating intent, processing of studies and suggestions in safeguarding all necessary research, quality control processing of project and documentation, technical overseeing with the goal of correct project realization and completion in the time and financial frame stipulated
- Building site management
- Project consultation with public bodies and organizations, building permits
- Automatic machine tamping guidance using the APK method
- Ground measurement Survey result verification according to § 13, odst. 1 zákona č. 200/1994 Sb., dle písm. a) a c)
